

## Form

Become an installation partner for the new generation of thermal storage solutions.

We count on innovative, dynamic and competent heating installers to install our Cowa COMPACT Cell. Together with you, we want to launch our product throughout Switzerland and drive forward the heating revolution. We would love to have you as an installation partner. Please return the completed form to the address provided below.

### Your advantages at a glance

- Company placement

Installation partners are placed prominently and in several locations on our website\*

\*Final website design in revision

- Cross-Selling

Over the last 6 months, we have received more than 150 enquiries from end customers from 12,000 visitors to our website. These are all looking for complete heating systems or partial systems. As our partner, we will refer the end customers to you for the installation of the complete system.

- Training

Participate in a product training session on one of our prototypes. You will learn first-hand about the benefits of the Cowa COMPACT Cell and how we market the products. At the same time, you can give us direct feedback and help us to optimise the installation process.
